Skills

HTML

CSS

JavaScript

MySQL

Node.js

MongoDB

React

I am a student currently enrolled in the UCSD extension coding bootcamp. I also attend California State University San Marcos and am majoring in Computer Science. I expect to graduate in Fall 2023. I am currently working on projects using JavaScript, Node.js, and MySQL and am eager to learn more.

Projects

Team Profile Generator

UCSD Coding Bootcamp

- This application is designed to create a profile with cards of your current employees using the node command line.
- Created using HTML, Tailwind CSS, JavaScript, and Node.js. The user can follow the prompts in the node command line to add employees. After all employees are added, an HTML page with their information will be created for the user.

Find Your Forever Friend

UCSD Coding Bootcamp

- This project is designed to match the user with an adoptable pet in an area close by.
- Utilizes HTML, Tailwind CSS, and JavaScript, as well as various APIs. My job was to display the pet's location using the Google Maps API and pull the pet's information to go onto a different page from the Petfinder API.

Geek Emporium

UCSD Coding Bootcamp

- This project is designed to allow users to post their collectible items and find other items to purchase.
- Utilizes JavaScript, Handlebars, Tailwind CSS, Node.js, and MySQL. My job was to set up the site's bones with handlebars, as well as all the styling with Tailwind CSS.

Education

2018-08 -

Associate of Arts: Communication Studies

2020-05

MiraCosta College - Oceanside, CA
